**Tiziana Maiuro – Renzo Rolando – Sigfrido Cellerai – Gian Piero Turchi**

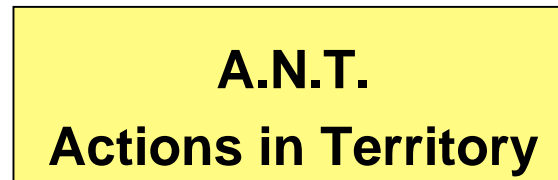

**HEALTH PROMOTION  
INTO STREET PSYCHOLOGY FIELD:  
A.N.T. PROJECT**

***Xth European Congress of Psychology***  
*3-6 July 2007, Prague, Czech Republic*

**Department of  
Mental Health**

**Service for Drug  
Addiction**

**Psychopoint  
Association**

**Multidisciplinary integrated équipe  
for health promotion in youth population  
through interventions in territory**

**Target: youth population from 14 to 25 years old**

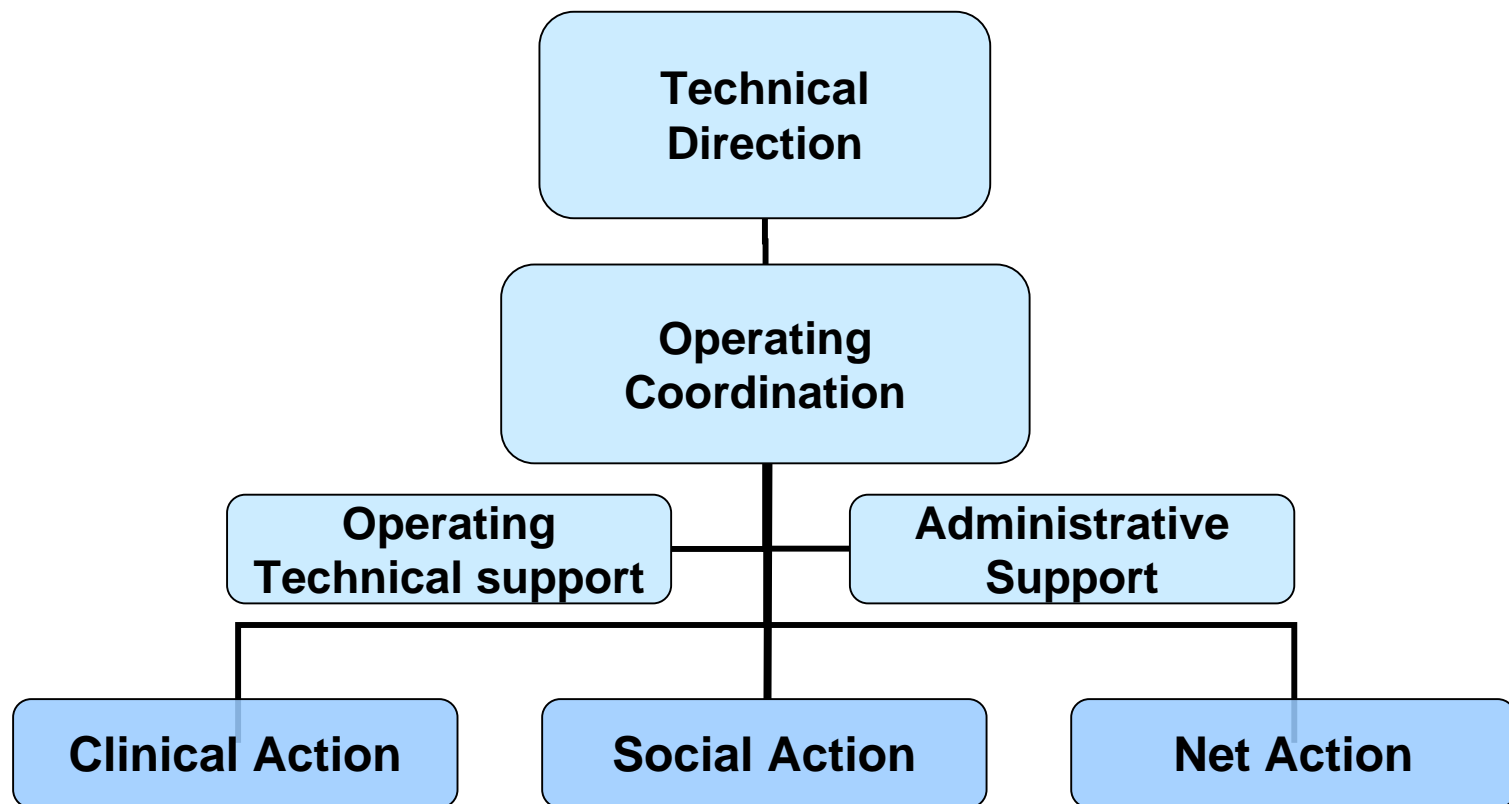

## STRATEGIC UNDER-OBJECTIVES

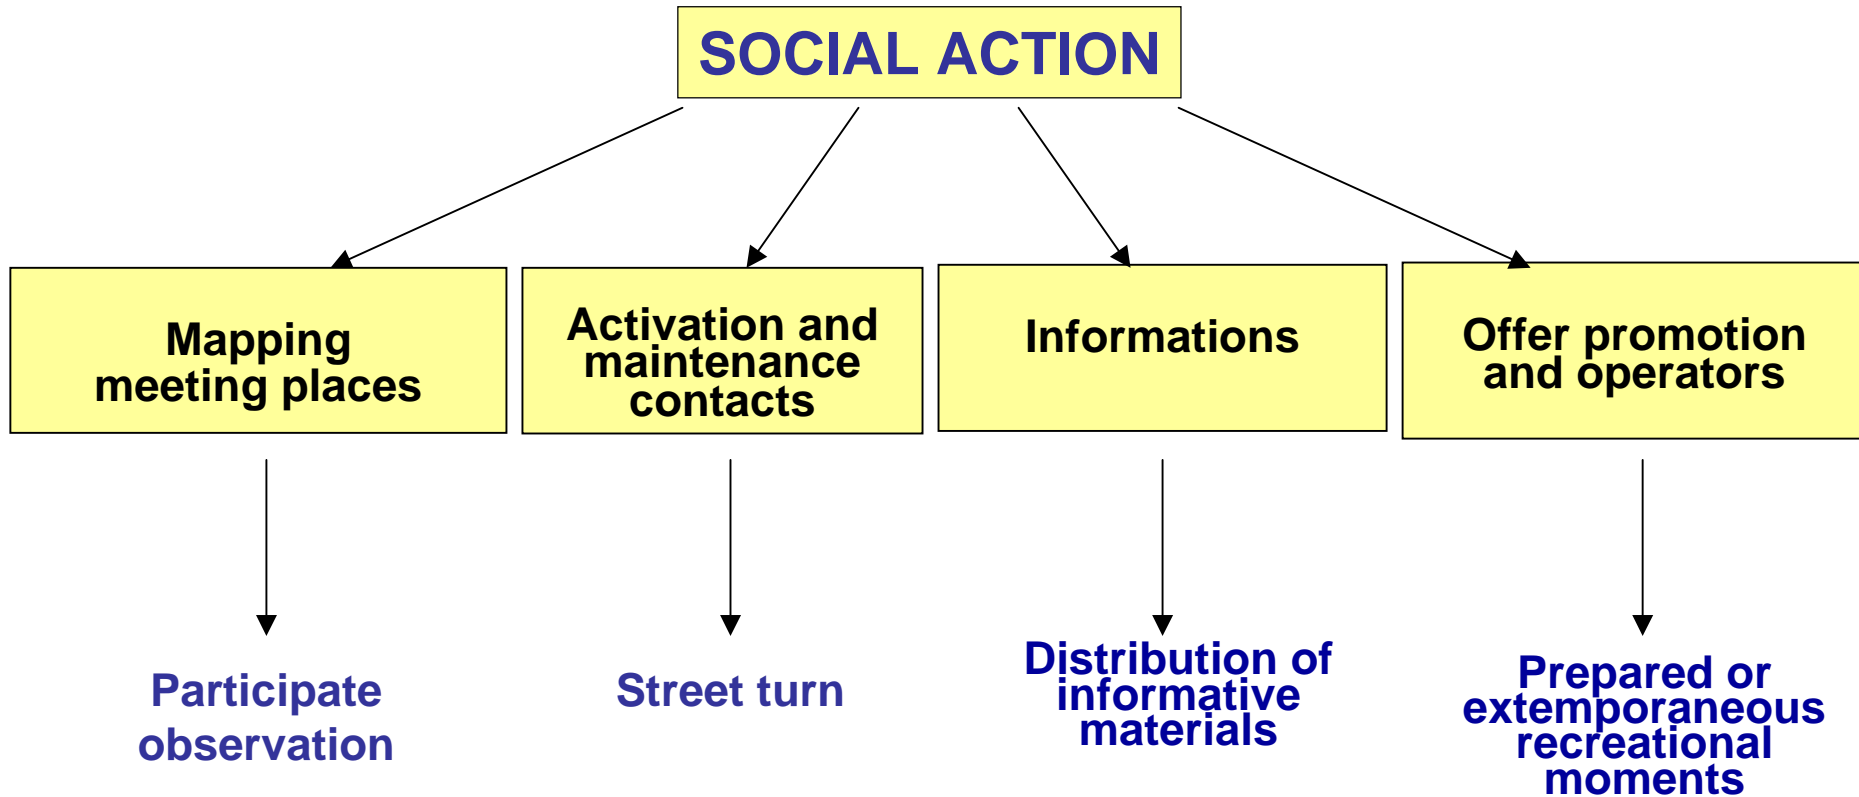

1. **survey** into the territory of reality constructions that involve the possibility of organic disease development or contemplates “uneasiness” and eventually ‘help request’ in order to **guide, accompany and intermediate** them to the Public Services;
2. **re-intermediation** to the Public Services of own ex-customer;
3. **non-specific intervention of health promotion.**

## TOOLS

- ✓ **Psychological and Psycho-pedagogical Services, free, anonymous** and easily accessible on territorial base;
- ✓ **to supply meeting and relation occasions not formal to all the young people contacted**, in order to facilitate the construction and the maintenance of a spontaneous social net able to render available knowledge modalities (processes of construction of the reality)
  - that they do not contemplate the disease as narrative possibility
  - from which is possible to anticipate the management of the situation ‘risk of organic disease’

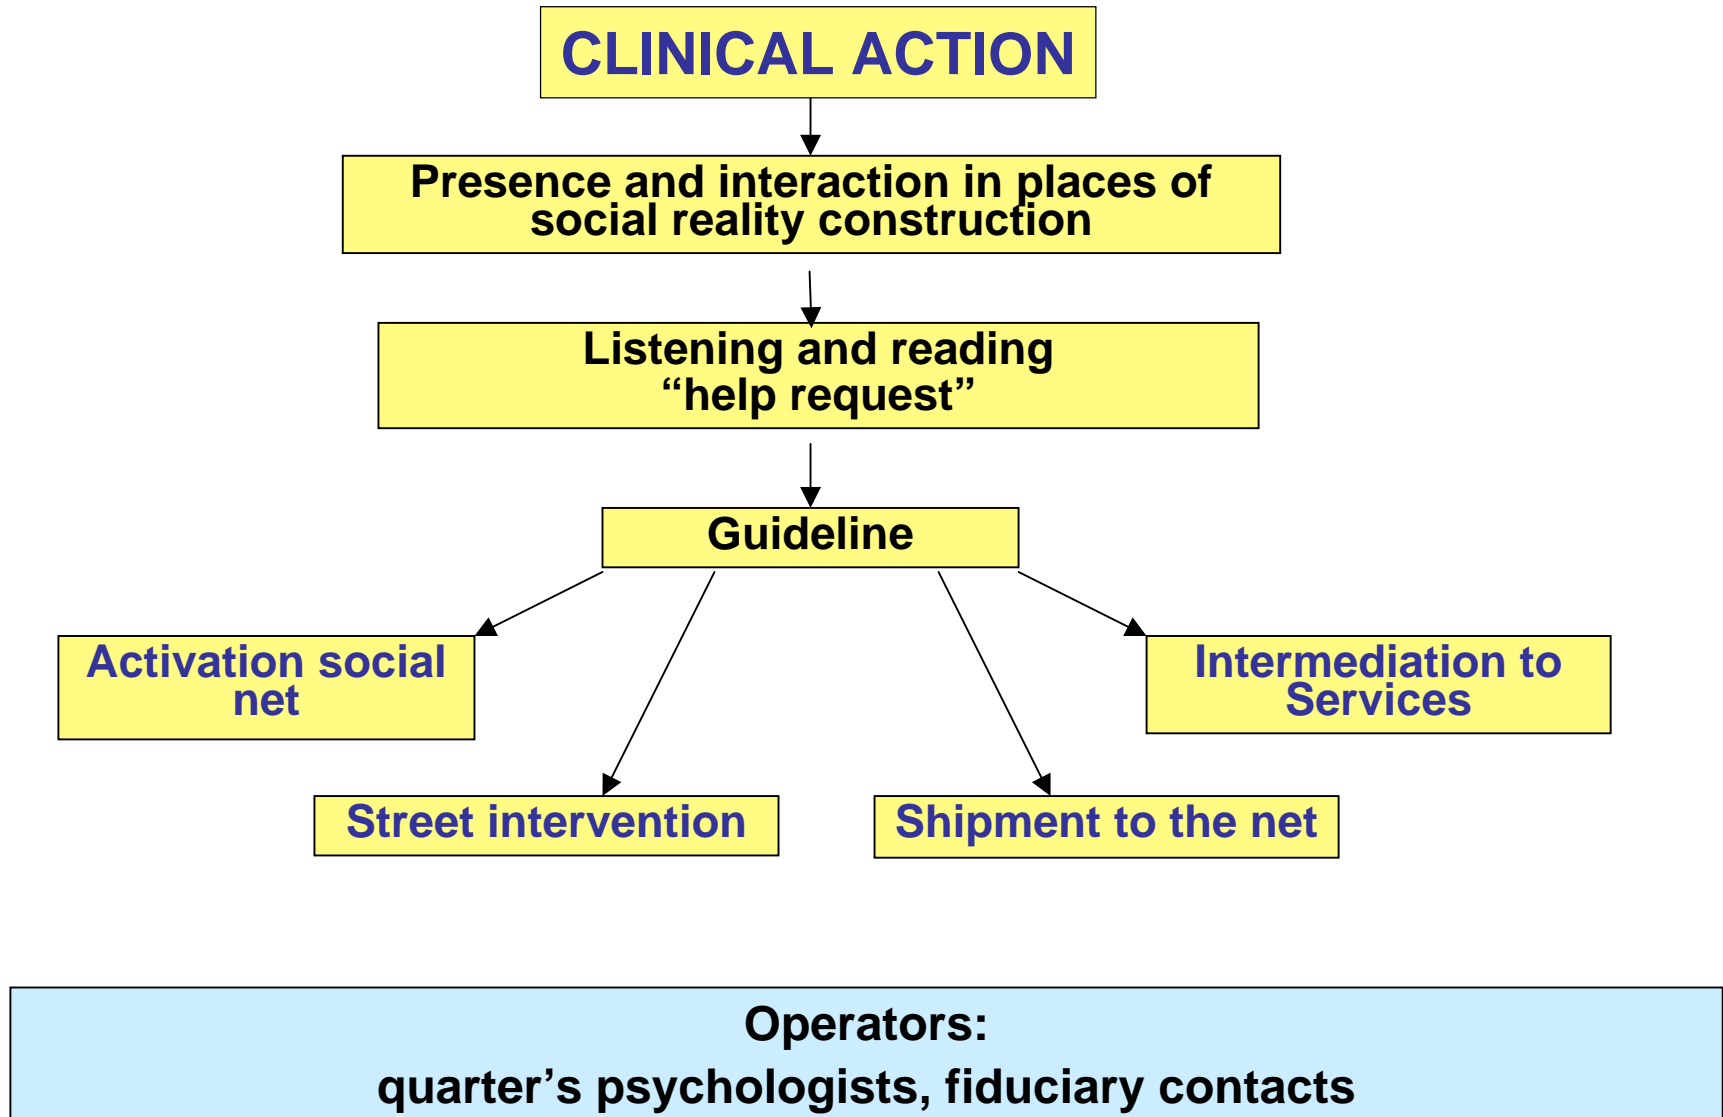

## ORGANIZATIONAL ORDER

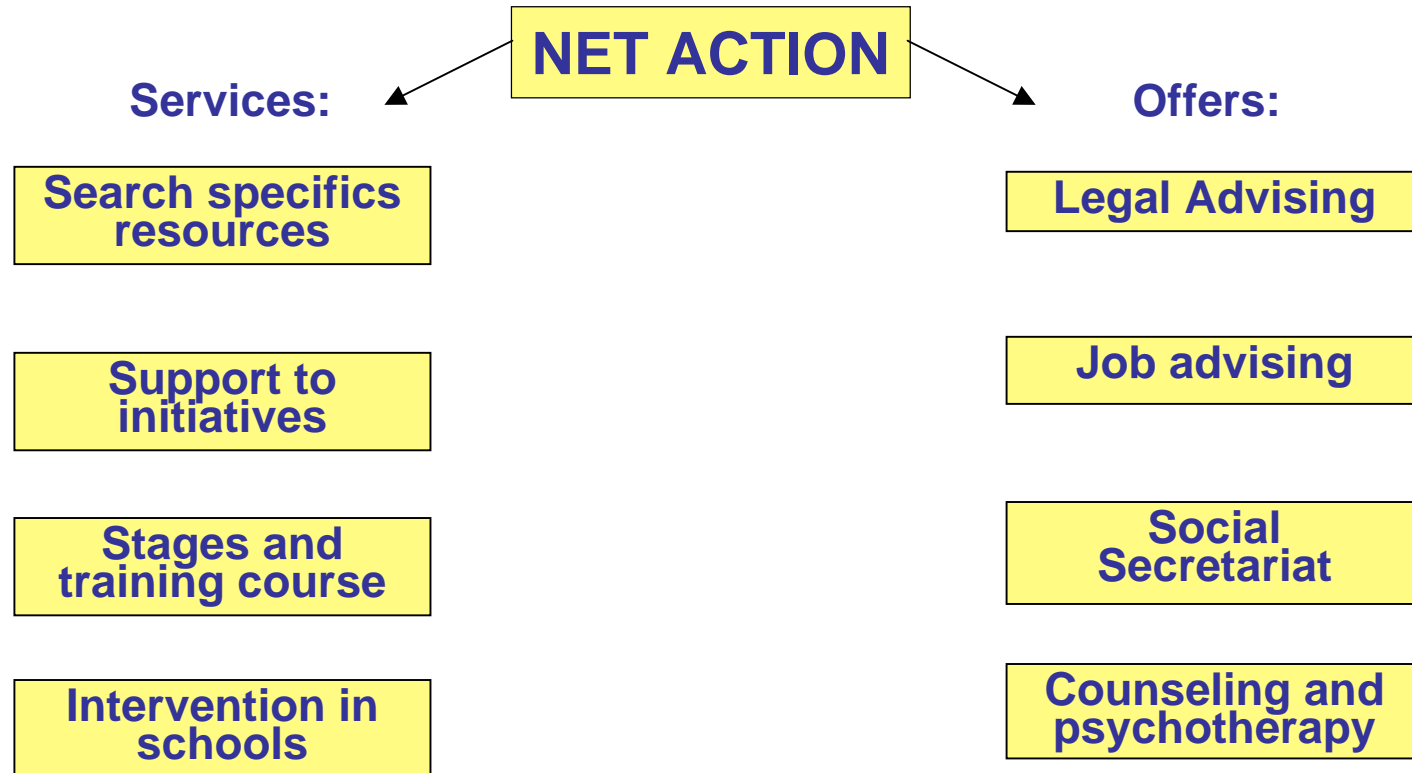

**STRATEGY 1**

**Operators:**  
**Street Educators-Entertainers, Peers Entertainers**

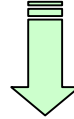

## STRATEGY 2

**STRATEGY 3**

**Operators:**  
**Psychotherapists, lawyers, sociologists, base operators (voluntaries)**

### ***A.N.T. Project as exemplification of Dialogic Model***

**assumption: HEALTH product of a *narrative tissue* composed of *discursive practices* available in a cultural context**

### ***STREET PSYCHOLOGY: A.N.T. Project operator in territory***

**territory as “setting”: operator in discursive context participates towards the processes of construction of the health reality**
